

Have a laptop with Wireless capability?

We now have a wireless network you can access. There are now access points in the Library, the Falcon room and the Learning Center for you to use.

How do you gain access? Be sure that your virus protection software is up to date and then set up an appointment with Mark Rowell in Room 186 to have your laptop inspected. Without this inspection the system will not allow your laptop to access the network.

Access points in the classrooms are setup to only work with the computers in that room. If you need access to these points for a class presentation, temporary access can be arranged in advance through Mark Rowell.
