

## **BIOL212R**

### **Topics in Biology: Bones, Blood, and Ballistics: Intro to Forensic Science**

Students in this course will apply real world science from the fields of biology, chemistry, and physics, use critical thinking skills and the scientific method, and gain laboratory experience while exploring the fascinating world of forensics. Students will develop knowledge of common forensic science concepts and analyze evidence utilizing standard practices from forensic science laboratories. Labs will encourage problem solving and teamwork while using sophisticated lab equipment and hands-on activities to explore topics such as bone decomposition, DNA analysis, blood splatter patterns, blood typing, and toxicology.
