## SPRING SEMESTER 2024

### CREDIT COURSE SCHEDULE

JANUARY 16 - MAY 4, 2024 (11-week Late Start: Feb 12-May 4, 2024) (May Grad Date: May 10, 2024)

(Courses run full semester unless otherwise noted by course title.)

**Prerequisite Requirements:** Some courses have prerequisite course(s) or minimum test scores (indicated above course title). If you did not have the prerequisite course(s) or testing at RVCC, please submit a copy of your transcript or test scores from other institutions, showing successful completion.

**Textbooks:** Information on required/recommended textbooks for courses, including ISBN numbers and prices, will be posted on the College Bookstore website: <http://www.rivervalley.bkstr.com>. If you see a "(NOLO)" designation next to a course title it means the materials for that course are No or Low Cost.

**Late Start Courses:** If you are enrolled in a late start course, your financial aid may not disburse until enrollment for the class can be confirmed. Please contact the Financial Aid Office if you have any questions.

**Billing, Schedules, and Grades:** Tuition and fees are due two weeks prior to the first day of the semester. RVCC does not send paper bills or schedules. Upon registration, you are enrolled unless otherwise notified. No confirmation will be mailed. Classes are subject to change. Students need to login to the Student Information System (SIS) for their E-bills, schedule, classroom location(s), grades, financial aid information, student email account, etc.

**Course Offering Options:** In addition to traditional face-to-face class meetings, RVCC offers courses in a variety of modalities to meet student needs. Online courses have no scheduled meeting times. Online courses are asynchronous and delivered via Canvas. While students can complete assignments at a time that fits their schedules, online classes have expectations including, but not limited to, regular and substantive faculty and student participation and assignment due dates. Remote Synchronous courses meet at designated times through Zoom. There is also a selection of hybrid options available to maximize flexibility and while offering synchronous opportunities to learn. When courses are listed as Synch. & Asynch. Online, there will be contact hours completed both together on Zoom and separately online. When the course location is listed as a town and Asynch. Online, you will meet face-to-face at the designated times with the remainder of the course taught asynchronously. Bimodal courses allow you to choose between two modalities according to the planned topic, personal need, or preference. A Hyflex course presents the components of hybrid learning in a flexible model that gives students the option of attending scheduled class meetings face-to-face, online, or remote synchronously. Students can choose their manner of participation for each class meeting according to the planned topic, personal need, or preference. Please consider technology needs such as strong internet connection, camera/mic/speakers, etc. Additionally, a distraction free environment will be most conducive to learning.

| 25025 | MATH 016R | CE1 | Fundamentals of Math Literacy - Lecture (NOLO) | 4 | Tu,Th | 6:00 PM | 7:50 PM | Bimodal (Claremont or Zoom) | Zoom/146 | Dorothy Miles |
|-------|-----------|-----|--|---|-------|---------|---------|-----------------------------|----------|---------------|

Prerequisite: Self-assessment. You should be able to perform the skills below on demand or with minimal review. These skills are typically mastered through the successful completion of high school algebra II or higher or their equivalents. If you are unsure about your preparation for this course, please request an assessment from the mathematics advisor. Fundamentals of Math Literacy treats all of these topics in depth to prepare you for this course. Prerequisite skills include: following the order of operations; applying the principles of rounding; making fraction-decimal-percentage conversions; reading and interpreting basic tables and graphs; performing operations with square roots; using scientific notation; and manipulating basic linear equations including isolating variables.

finding slope, y-intercept, and writing equations of lines given two points. Select one section:

|       |           |     |  |   |                  |                     |                      |  |                      |                                    |

| <i>Prerequisite: None; successful completion of one previous laboratory science course recommended. Course Description: Students in this course will apply real world science from the fields of biology, chemistry, and physics, use critical thinking skills and the scientific method, and gain laboratory experience while exploring the fascinating world of forensics. Students will develop knowledge of common forensic science concepts and analyze evidence utilizing standard practices from forensic science laboratories.</i> |            |         |   |         |      |            |          |                       |      |                     |
| <i>Labs will encourage problem solving and teamwork while using sophisticated lab equipment and hands-on activities to explore topics such as bone decomposition, DNA analysis, blood splatter patterns, blood typing, and toxicology. Select both Lecture and Lab:</i>  |            |         |   |         |      |            |          |                       |      |                     |
